The Council is currently preparing a new Local Plan which will guide future development in the borough up to 2036.

We consulted in 2017 on the first stage of the new Local Plan’s preparation: the Issues and Options stage.

This is an opportunity for you to have a say during the second stage in the new Local Plan’s preparation: the Draft Local Plan.

We hope that by attending this exhibition, and talking to the Council officers here, this will help you to:

• learn more about the Draft Local Plan for the borough
• know where on the website to look for further information tunbridgewells.gov.uk/localplan
• make comments on the Draft Local Plan
This exhibition presents the main elements of the Draft Local Plan

It highlights, in turn:
- Context of the Local Plan
- The work that underpins the Local Plan
- The proposed development strategy
- Proposals for particular towns and villages (focusing on local places)
  - Subject themes and policies
  - Making comments and next steps

Available information
We are consulting on the Draft Local Plan, and its Sustainability Appraisal – please see the relevant board for more information on the Sustainability Appraisal). All of the documents which support the Draft Local Plan, including the evidence base, further information on particular topics, and other papers, are all published and available on the Council’s website: tunbridgewells.gov.uk/localplan

The supporting documents fall under the following broad themes:
- **Housing**, including:
  - the topic paper explaining the Distribution of Development
  - the Strategic Housing and Economic Land Availability Assessment (which assesses whether the sites submitted to the Council by landowners and developers are potentially suitable for development)

- **Employment, Leisure & Retail**, including evidence on the economic needs, retail and hotel capacity of the borough

- **Environment & landscape**, including:
  - the Strategic Flood Risk Assessment
  - the Landscape Sensitivity Study

- **Transport & infrastructure**, including:
  - the Infrastructure Delivery Plan which sets out the infrastructure required to support the proposals in the Draft Local Plan
  - the Transport Assessment Review which models the transport impacts of the proposals, and how this impact can be addressed

- **Others**, including the Interim Duty to Cooperate Statement which explains how the Council discusses important planning and infrastructure matters with other Councils

Paper copies of the main documents may also be seen at:
- the Tunbridge Wells Gateway
- your local town or parish council
- your local library
Why is the Local Plan needed?
Planning law and national policy require the Council to produce a Local Plan that looks ahead for at least 15 years, and to review it at least every five years to take account of changing circumstances.
Without an up-to-date Local Plan, development will come forward in an unplanned way, including more frequently through developers pursuing appeals to the ‘Planning Inspectorate’. This can result in a reduction in the ability for decisions to be made locally, and increases the risk that development may not deliver the important necessary infrastructure or meet local priorities.

Why are we undertaking consultation on the Draft Local Plan?
Legislation and regulations require that all Councils undertake consultation at different stages when producing a Local Plan: usually for a minimum of two ‘consultation periods’.
However, the Council thinks that the views of residents, businesses, etc, are of vital importance to the development of the new Local Plan, and therefore that it is best to have three consultation periods, so that your comments and representations on the Draft Local Plan can be considered and taken into account in the formation of the final version of the Local Plan.

Why is the Draft Local Plan so detailed?
The Council considers it is best to consult at this stage on a full draft of the Local Plan, so there is absolute clarity on the sites and policies which are being proposed.
The Draft Local Plan provides a strategy for development, place shaping policies for different parts of the borough and detailed policies covering key themes such as affordable housing, transport, capacity of infrastructure, and contributing to climate change objectives.

This means that the Draft Local Plan is a long document of several hundred pages, but this is necessarily so, as it covers such a wide range of matters, and must plan for such a long period of time.
Context for the new Local Plan

How many new homes are needed?

Government projections estimate that the number of households in the borough is expected to increase by nearly 10,000 households over the plan period, up to 2036. This mainly reflects demographic changes, with people living longer and the trend of smaller household sizes. With further homes needed to help improve local affordability, Government’s figures identify a housing need for the borough of 13,560 dwellings over the period 2016-2036.

While this level of growth is far higher than existing plans provide for, the Government has made clear its expectation that councils achieve a ‘significant boost’ in the supply of homes to meet identified needs.

In addition, the Council is obliged to consider whether there are opportunities to help meet any needs that cannot be met in neighbouring Council areas.

Are there other development needs?

New population generates a need for other development, such as employment space, community and leisure facilities, schools and other new infrastructure.

Work undertaken as part of the evidence base has indicated that a minimum of 14 hectares (35 acres) of additional employment land is required to support the growing workforce and strengthen the economic base of the borough.

Environmental designations

As well as aiming to meet development needs, national planning policy also attaches importance to environmental designations, including Green Belts and Areas of Outstanding Natural Beauty (AONBs).

The map below indicates the extent of the Green Belt (which extends round Royal Tunbridge Wells and up to the western edge of Paddock Wood) and the High Weald Area of Outstanding Natural Beauty (AONB). Together these designations cover 75% of the Borough.

The map also shows the key areas which are subject to flooding, the main transport routes, and the main settlements.

There are also other important designations, including for biodiversity (such as SSSIs, Local Wildlife Sites and Ancient Woodland) and heritage (such as Listed Buildings and Conservation Areas).

The Development Strategy considers all these designations, which help define local character.
Evolution of the Development Strategy

The Draft Local Plan proposes to meet development needs as much as possible within the context of the various constraints in the borough, including the Green Belt, Area of Outstanding Natural Beauty (AONB) and areas of flooding. The assessment of potential sources of land supply is summarised below.

Urban brownfield and undesignated land

In order to maximise the use of urban land, the strategy provides support for the development of brownfield sites in and around settlements. Previously identified sites have been looked at again to see if more development can be accommodated, whilst still ensuring that the local environment will be protected.

In addition, recognising that small sites continue to come forward on a regular basis, the strategy makes allowance for small unidentified ‘windfall’ sites (50 dwellings per year from 2022 – 2036), many of which will be on brownfield land.

As the map on the previous board shows, only a fairly narrow belt of land along the northern edge of the borough lies outside of the national environmental designations, extending from Paddock Wood in the west to around Frittenden in the east, and including Horsmonden.

However, it is clear from an assessment of sites put forward by landowners and developers to successive “calls for sites” that the combined capacity of suitable sites within existing urban areas, sites outside of the Green Belt, as well as small sites in the AONB, is small relative to the housing need.
Evolution of the Development Strategy

New and expanded settlements

Given the large housing need and the fact that feedback from earlier consultation on an ‘Issues and Options’ document gave “in principle” support for a new settlement, options for potential locations have also been evaluated.

A new or expanded settlement within the AONB was discounted, as being of too large a scale to be justifiable in the context of policies to conserve its landscape and scenic beauty.

A new/expanded settlement in either the eastern, Frittenden area or the central/northern, Horsmonden area was ruled out for a combination of highway suitability, access to jobs and higher order services, and very rural character, as well as piecemeal land ownership (with no large sites submitted) in the case of Frittenden.

A number of sites around Paddock Wood, extending into Capel Parish were submitted which, collectively, would amount to a substantial expansion. It was recognised that there is merit in taking a comprehensive, integrated approach to growth in order to effectively address transport, flood risk and other infrastructure provision, as well as to help provide an economic stimulus.

Although within the Green Belt, land at Tudeley is outside the AONB and relatively well related to nearby Tonbridge, Paddock Wood and Royal Tunbridge Wells/Southborough. Also, it is deliverable, being essentially in a single ownership.

These two proposals to be delivered through a masterplanned approach, applying garden settlement principles, are elaborated upon on the Capel and Paddock Wood boards.

Green Belt and High Weald Area of Outstanding Natural Beauty (AONB)

Detailed examination of the potential for other Green Belt releases and some larger developments in the AONB has been undertaken.

Following assessment of the contribution of land to Green Belt objectives, a relatively small proportion - about 5.3% – is being released for development, with about 83% of this being through the two new/expanded settlements. The balance includes seven sites being proposed for housing and two sites for employment use.

An assessment of the capacity for larger developments in towns and villages within the AONB found some scope for residential and employment development spread across a number of settlements.
The Development Strategy

The proposed development strategy that has resulted from the analysis is presented in the Draft Local Plan on the ‘Key Diagram’ – see adjoining board.

The total capacity of all identified sites in the Draft Local Plan (comprising outstanding planning permissions, retained sites from the previous Local Plan allocations, together with the proposed new allocations) is 14,776 net additional dwellings. This is 9% more than the Government’s minimum requirement of some 13,560 dwellings, which provides flexibility for any delays and/or the non-delivery of a proportion of the identified sites.

This capacity for further housing means that the borough does not have the scope to meet unmet need of some 1,900 homes from Sevenoaks area.

Further information about the evolution of the development strategy is set out in a Distribution of Development Topic Paper – available at tunbridgewells.gov.uk/localplan

Specific sites that are proposed to be allocated for development are shown on the Policies Map - Inset Maps for each settlement. The coverage of these is illustrated on the map opposite. Inset maps for locations covered by this exhibition are displayed on subsequent boards.

To view Inset Maps for other locations, please speak to a planning officer.

Limits to Built Development (LBDs)

Limits to Built Development (LBDs) are policy lines used to differentiate between the built-up areas of settlements and areas of countryside beyond. They are drawn around settlements to help focus growth in sustainable locations and to protect more rural areas from inappropriate development.

Within LBDs, there is a presumption that development such as infilling, redevelopment and changes of use are acceptable in principle, subject to meeting policy requirements, such as to protect amenities, local character and biodiversity.

Outside LBDs, much stricter countryside policies over new development apply, although some specific exceptions exist, such as for agricultural and woodland activities, equestrian and tourism uses, and affordable housing to meet local needs.
The Proposed Development Strategy, 
Key Diagram and Main Proposals

**Royal Tunbridge Wells**
- Approx 780 dwellings allocated on 17 sites, plus 440 dwellings which already have planning permission
- 14 hectare business park with over 80,000 sqm floorspace
- New secondary school and two primary schools extended
- New sports hub
- New cultural and leisure facilities
- Major new business park adjoining North Farm

**Southborough**
- Approx 30-120 dwellings on allocated sites, plus 65 which already have planning permission
- The Southborough Hub

**Speldhurst**
- Approx 18 dwellings on one site

**Pembury**
- Approx 280 dwellings on five sites, plus 19 which already have planning permission
- New car sales complex
- New road to run parallel to the A228 (Colts Hill bypass)

**Lamberhurst**
- Approx 55 dwellings on two sites

**Brenchley & Matfield**
- Approx 121 dwellings on four sites

**Horsmonden**
- Approx 265 dwellings on three allocated sites
- Horsmonden is outside the AONB, which has been a factor in the amount of housing allocated here

**Frittenden**
- Approx 28 dwellings on one site

**Cranbrook & Sissinghurst**
- Approx 697 dwellings in Cranbrook and Hartley (which includes approx 225 at land adjacent to the Crane Valley allocated in the current Local Plan), and 64 which already have planning permission
- Approx 108 dwellings at Sissinghurst and a replacement village hall

**Benenden**
- Approx 43 dwellings at Benenden, plus 12 which already have planning permission
- Approx 47 dwellings at East End (outside the AONB) plus 22 which have planning permission
- Site allocations correspond with those in the Benenden Neighbourhood Plan
- Removal of Limits to Built Development at Iden Green

**Hawkhurst**
- Approx 681 dwellings, plus 25 which already have planning permission
- At Highgate, the provision of a new link road across the Hawkhurst Golf Course, enabling the closure of the northern arm of the crossroads
- New village hall, doctor’s surgery, parking and expansion of Gill’s Green employment area

**Sandhurst**
- Approx 24 dwellings on two sites

**Land at Capel and Paddock Wood, and Tudeley – page 6**
- Approx 121 dwellings on four sites

**Housing (Units)**
- Neighbourhood Centre
- Village Centre
- Key Employment Areas
- New Secondary School
- Capel and Paddock Wood Masterplan

**Main Urban Area**
- AONB
- Flood Zone 3b
- Green Belt

**Roads**
- Railway
- Primary Route
- Main Road
- Safeguarded Route
- Proposed Link Route

**Villages**
- Town
- Rural Service Centre
- Village

**Housing**
- 10
- 100
- 1,000

**Local Plan**
- Tunbridge Wells Borough Council
Sustainability Appraisal

Sustainable development is the key goal of the planning system and is defined as: ‘Development that meets the needs of the present without compromising the ability of future generations to meet their own needs’

(World Commission on Environment and Development, 1987)

To ensure that the Draft Local Plan contributes to sustainable development, a Sustainability Appraisal has been undertaken.

It assesses the strategy, site allocations and policies in the Plan – and reasonable alternatives to them - against nineteen sustainability objectives that reflect social, economic, and environmental issues.

The findings of the Sustainability Appraisal have informed the choices made about the pattern of future development, as well as the scope and nature of themed policies.

It is inevitable that many proposals will have a mixture of potentially positive and negative effects. Where potentially negative effects are highlighted, measures to mitigate these are incorporated into policies, wherever practicable.

The Sustainability Appraisal, which includes a Non-Technical Summary, is available to view at: www.tunbridgewells.gov.uk/localplan

The Sustainability Appraisal is published for consultation alongside the Draft Local Plan.

Details of how to comment are on the last exhibition board and on the website, as above.
Infrastructure

What is infrastructure?
The term ‘infrastructure’ refers to the facilities which enable an area to function. It includes things like:
- transport routes;
- schools;
- libraries;
- doctors surgeries and hospitals;
- areas of open space and playing fields;
- cultural or social facilities, such as community halls;
- broadband and mobile phone coverage;
- areas of flood storage, or flood defences.

How is infrastructure provided?
There are times where the government, or particular agencies/organisations, deliver new infrastructure, and provide all the funding for this. However, in most instances, new infrastructure is largely or entirely funded by new development.

It is an important element of the national planning system that development proposals are only required to provide the infrastructure, or the money to pay for that infrastructure, to deal with the increased pressure which that development puts on the system. The planning system cannot usually require infrastructure provided as part of a development to rectify any existing problems.

Liaison with infrastructure providers
Throughout the preparation of the Draft Local Plan the Council has been liaising with infrastructure providers to identify what infrastructure will be required, and when.

Key infrastructure schemes and requirements are identified in the Infrastructure Delivery Plan.

Key Elements of infrastructure include:
- Two new secondary schools (between Tonbridge and Tudeley, and at Spratsbrook, south of Royal Tunbridge Wells);
- A new road to run parallel to the A228 (the Colts Hill bypass);
- Flood mitigation measures, particularly at Capel and Paddock Wood.

Colts Hill bypass
Policy Themes

The Local Plan contains a range of new or updated policies to address particular issues associated with certain aspects or types of development. These are grouped under five themes, as below.

**Economic Development**

**Issues and Opportunities**

The borough must ensure that there is a sufficient level of employment space and opportunities to continue supporting the local economy.

There is an increasing need for new technology/high speed broadband that enables increased opportunities to work from home and in rural areas of the borough.

Local shops and services need to be protected and retained wherever possible to ensure that communities have continued access to these in years to come.

**Policy Response**

- Identification of key employment areas and retention of existing sites (Policies ED1 and ED2)
- New digital communications and fibre network requirements in new development to enable greater broadband connectivity across the borough (Policy ED3)
- Provision for business, tourism and recreation development in rural areas (Policies ED4 – ED7)
- More flexible approaches to commercial centres, including more support for the retention of local shops and services (Policies ED8 – ED12)

**Housing**

**Issues and Opportunities**

- The borough is identified as a 'high affordability pressure area' in significant need of affordable housing provision, reflected by the average house price being 12.76 times greater than median earnings in 2018.
- There is an ageing population in the borough whose needs will need to be planned for in the years to come.
- Small-scale householder proposals must be in-keeping with the form and scale of existing buildings.

**Policy Response**

- Increased affordable housing provision on larger greenfield sites and financial contributions from smaller sites, with higher levels to be provided as social rented housing (Policy H5)
- New policy promoting the housing needs of older people (Policy H9)
- Updated policies for householder proposals (Policies H15 – H17)

These are the headlines of a selection of key policies. For the full scope and wording of policies, please see Section 6 of the Draft Local Plan.
Policy Themes

The Local Plan contains a range of new or updated policies to address particular issues associated with certain aspects or types of development. These are grouped under five themes, as below.

Environment

Issues and Opportunities

New development must be sustainably built for generations to come in light of the UK government’s declaration of a climate change emergency.

The core historic and heritage assets of the borough’s settlements must be conserved.

Net gains for nature must be achieved in all new development to support the government’s recent strengthened approach toward conserving and enhancing biodiversity.

There is now scope to ensure that Local Green Spaces demonstrably special to local communities are protected.

Policy Response

- New design policy (Policy EN1)
- New targets for more sustainable buildings, adaptive to climate change (Policies EN2 – EN5)
- Requirements to conserve heritage assets (Policies EN6 – EN8)
- New approach promoting dark skies in rural areas (Policy EN10)
- New, positive approach to biodiversity, including principle of net gains (Policies EN11 – EN15)
- Over 200 Local Green Space designations across many settlements (Policy EN17)
- Wide-ranging recognition of landscape quality, including the AONB (Policies EN18 – EN21)
- New green infrastructure policy and supporting framework (Policy EN16)

These are the headlines of a selection of key policies. For the full scope and wording of policies, please see Section 6 of the Draft Local Plan.
Policy Themes

The Local Plan contains a range of new or updated policies to address particular issues associated with certain aspects or types of development. These are grouped under five themes, as below.

**Transport**

**Issues and Opportunities**

- In support of government initiatives to reduce the country’s carbon emissions, local policy should, where possible, promote the use of active travel (including walking and cycling) over private car use.
- A suitable level of parking provision should be provided across the borough that reduces the need for on-street parking.
- Transport infrastructure should be sustainably planned so that future needs can be accommodated.
- Disused railways should be safeguarded to either allow for potential reopening as a means of providing further future transport options or for green infrastructure purposes.

**Policy Response**

- Further promotion of active travel (walking and cycling) (Policy TP2)
- Increased parking standards (Policy TP3)
- Safeguarding land for road and rail schemes (Policies TP5 and TP6)

**Open Space, Sport and Recreation**

**Issues and Opportunities**

- Green and open spaces are important, and as the population in the borough increases, their importance will also increase. These areas must therefore be safeguarded for future generations from development.

**Policy Response**

- Identification of existing open space areas and facilities to be protected (Policy OSSR1)
- Standards for new publicly accessible open space and recreation alongside new development (Policy OSSR2)

These are the headlines of a selection of key policies. For the full scope and wording of policies, please see Section 6 of the Draft Local Plan.
Making Comments

We hope that you have found the exhibition useful and have a better understanding of what the Draft Local Plan is proposing – and why.

You can comment on any aspect of the Draft Local Plan, or the accompanying Sustainability Appraisal.

Comments need to be in writing (including electronic submissions).

To comment, please visit the Local Plan web page:
www.tunbridgewells.gov.uk/localplan

There is a link to the Consultation Portal where you can read the document, draft your comments and submit them to us at the press of a button. There is also a link to a downloadable comments form if you prefer. A separate form should be submitted for each representation.

Please remember - comments must be received by the Council no later than 5pm on Friday 1 November 2019 in order to be duly considered.

What happens next

All comments received within the consultation period will be considered by the Council and will inform the final form of the Local Plan.

This illustration shows where we are in the plan-making process.

There will be an opportunity to make formal representations on the final version of the Local Plan before the plan is then examined by an independent Planning Inspector acting on behalf of the Government.

Thank you for coming
Policy STR/HA1 - Strategy for Hawkhurst Parish

Seven sites are proposed to be allocated for development, providing approximately 681-731 dwellings. The Limits to Built Development (LBD) around the main settlement area are to be amended accordingly. The existing LBD at Gill’s Green is to be removed and retained instead as a Key Employment Area, which will be safeguarded for future employment uses. A key transport proposal is for a relief road to reduce traffic congestion around the A268 Rye Road/Cranbrook Road/Highgate Hill crossroads. All proposals will require an assessment of the impact on the crossroads at Highgate; as well as any impact on the Filmwell crossroads (junction of A21 and A268), and financial contributions may be required to mitigate any such impact. Proposals will also have to evidence that there is sufficient additional capacity at the crossroads to accommodate new development. Other infrastructure provisions are for financial contributions towards the Bedegbury to Sissinghurst cycle path route; a new GP surgery; improvements to public car parking provision to serve Hawkhurst Highgate; provision of a new community facility and improvements to recreational facilities.

Policy AL/HA1 – Land forming part of Hawkhurst Golf Course to the north of the High Street

This site is proposed to be allocated for 400-450 dwellings, a relief road (which must reduce traffic congestion at the crossroads) and the closure of the northern arm of the crossroads, and community centre, with public parking provision. The central part of the site is protected from development by a designated landscape/open space buffer. The development will be informed by a masterplan which will include a detailed programme and timetable for the construction of the relief road. The policy requirements also include that there be high levels of permeability through the site and links to the surrounding area, the provision of cycle and pedestrian links to Gill’s Green, to the commercial centre of Hawkhurst, provision of electric vehicle charging points and flood mitigation measures. Financial contributions may also be sought towards improved bus services, road signage (particularly to divert HOVs away from Highgate Hill) and improvements to the public realm at the centre of Hawkhurst. A planning application for up to 417 dwellings, a care home, facilities such as a doctors’ surgery and community hall, public car park, public park, open space and recreation facilities, etc. is currently being considered by the council. Similarly, another planning application for 24 homes in the very south eastern part of the site.

Policy AL/HA2 – Land at The White House, Highgate Hill

This site is proposed to be allocated for 15 dwellings, including conversion of The White House. Since the Draft Local Plan first became public, the Council’s Planning Committee has resolved to grant planning permission for the demolition of the existing dwelling and the construction of 43 retirement living apartments.

Policy AL/HA3 – Land to the east of Heartenoak

This site is proposed to be allocated for 28 dwellings. The site already has planning permission for 28 dwellings and if the development relating to it has been substantially completed by the publication of the Regulation 19 Pre-Submission Local Plan, then this policy will be deleted. The northern part of the site is protected from development by a designated landscape buffer to be used as accessible public open space. The policy also requires the provision of passing places along Heartenoak Road.

Policy AL/HA4 – Land at Fowlers Park

This site is proposed to be allocated for mixed use consisting of approximately 100 dwellings, a medical or community facility and the safeguarding of land at its eastern end for future school expansion – it is likely that playing pitches would potentially be located to this part. The northern part of the site is protected from development by a designated landscape/open space buffer. Sufficient public parking is to be provided for the medical/community use, as well as 15 additional car parking spaces for public use.

Policy AL/HA5 – Brook House, Cranbrook Road

This site is proposed to be allocated for 25 apartments, reflecting an existing planning permission. Should the development relating to it have been substantially completed by the publication of the Regulation 19 Pre-Submission Local Plan, then this policy will be deleted.

Policy AL/HA6 – Land off Cophall Avenue and Highgate Hill

This site is proposed to be allocated for 70-79 dwellings with vehicular access from Highgate Hill. The southern part of the site was subject to planning application 18/01063 for residential development (refused particularly due to design concerns related to the vehicular access onto Cophall Avenue). An appeal is expected to be lodged imminently against this refusal. The more northerly part of the site is subject to pending planning application 19/01253. The policy is clear that it is expected that the site is developed as a single site, rather than separate southerly and northerly parts with different vehicular accesses. A significant part of the site at its eastern end is protected from development by a designated landscape/open space buffer.

For full details of site allocations, and policy requirements, see the Draft Local Plan.
Policy AL/HA7 – Sports Pavilion, King George V Playing Fields, The Moor
This site is proposed to be allocated for development of a community facility to include a range of services and facilities, including accommodation for changing rooms, meeting rooms, main hall, storage buildings, car parking and a new outdoor playground.

Policy AL/HA8 – Hawkhurst Station Business Park
This site is proposed to be allocated for employment/business uses with vehicular access from the existing employment site to the north and provision of cycle and pedestrian links to Hawkhurst via the Golf Course site.

Policy AL/HA9 – Land at Santers Yard, Gill’s Green Farm
This site is proposed to be allocated for mixed use, comprising 38 dwellings in the southern part of the site (to be accessed from either Slip Mill Lane or Patchwork End) and employment/business uses in the northern part of the site (to be accessed as per Policy AL/HA8 above); both of which are to be separated by a central landscape/open space buffer. There should also be provision of cycle and pedestrian links to Hawkhurst via the Golf Course site.

Box 11:
Policy AL/HA10 – Site at Limes Grove
This site is proposed to be safeguarded for employment/business uses and will be potentially released for development at the five year review of the Local Plan if monitoring indicates that other employment allocations have not come forward, or there is evidence that further employment provision is required in the eastern part of the borough.

For full details of site allocations, and policy requirements, see the Draft Local Plan.
The policy also specifies that the proposed layout of the site which is protected from development.

Policy AL/SA2 – Land adjacent to Old Orchard and Stream Pit Lane

This site is proposed to be allocated for 10-12 dwellings. There is a landscape/open space buffer running along the southern boundary of the site which is protected from development.

The policy also specifies that the proposed layout of the scheme must not compromise access to the existing allotments adjacent to the site.

Policy AL/SA1 – Land on the south side of Sayville, Rye Road and west of Marsh Quarter Lane

This site is proposed to be allocated for 10-15 dwellings. There is a landscape/open space buffer running along the southern boundary of the site which is protected from development.

A planning application has been submitted which includes the whole of the land identified in the policy as suitable for housing, plus further land to the south. This application is for 30 dwellings. The Council has advised the applicant that this will not be supported due to the harm caused to the landscape by the proposed housing further to the south, amongst other things.

For full details of site allocations, and policy requirements, see the Draft Local Plan.
Tunbridge Wells Borough Council is currently preparing a Local Plan, which will guide future development in our borough up to the year 2036.

We are consulting on the second stage in this process, the Draft Local Plan (Regulation 18), for six weeks from Friday 20 September to 5pm on Friday 1 November 2019.

The draft document contains a proposed development strategy for future development, proposed site allocations and policies against which future development proposals and planning applications will be assessed.

This is a further opportunity for you to have a say in the preparation of our Local Plan.

The Borough Council will host a series of exhibitions during the consultation period. The dates and venues for these are as follows:

<table>
<thead>
